DETAILED ACTION

Specification

The disclosure is objected to because of the following informalities:

On Page 3, Line 25: Wordings "Fig. 5" are missing for beginning of the line.

Appropriate correction is required.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1 – 14 are rejected under the judicially created doctrine of non-statutory double patenting as being unpatentable over claims 1 – 12 of copending application No. 10/612547 in view of Duddy et al. (4,784,262, 11/15/1988).

The copending application and the pending claims set forth the same invention of substantially the same scope except the invention of copending application claims 1 – 12 contain a cassette assembly. However, it is well known in the art to provide a cassette assembly (as disclosed and shown by Duddy et al.) for storing and enabling dispensing of loose-piece parts to facilitate the function of apparatus requiring the parts to perform a work step.
